

# AGGREGATE RESOURCES STATISTICS IN ONTARIO

## PRODUCTION STATISTICS 2022

**94,000  
TONNES**

of aggregate are needed  
to build a hospital

**36,000  
TONNES**

of aggregate are used to build  
1 km of a 4-lane highway

**250  
TONNES**

of aggregate are needed to  
build the average home

**\$1.6  
BILLION**

is the annual contribution of  
aggregate to the Ontario GDP

# AGGREGATE RESOURCES STATISTICS IN ONTARIO

## Overview

The aggregate industry plays a foundational role within the Ontario economy. The economic activity generated by the industry is not only with the aggregate itself mined in Ontario but as feedstock to industries that use the raw materials for construction and manufacturing including; cement and concrete products, asphalt, chemicals, clay, glass, and other aggregate-based products.

Aggregate resources are used in the everyday lives of all Ontario residents, and make up an integral part of our roads, sidewalks, sewers, subway tunnels and airports, as well as our homes, offices, hospitals, schools and shopping centres. Aggregates contribute \$1.6B to the Ontario GDP annually.

In 2022, there were 3,573 licences for pits and quarries on private land in areas designated under the Aggregate Resources Act (refer to Appendix D – Map of Areas Designated), and 2,443 aggregate permits on Crown land and 2 wayside permits.

## Aggregate Production

Production of mineral aggregates in 2022 totaled just under 173.5 million tonnes, a decrease of 4.5 million tonnes or -2.5% less than the tonnage reported in the previous year. Production from licenced operations was down 4.3 million tonnes or -2.6% compared to 2021 (162.5 million in 2022 from 166.8 million tonnes in 2021). Forestry Aggregate Pits (formerly Category 14) pit production has remained the same. Two Wayside permits were issued in 2022; small volume production reduction to 0.251 million in 2022 from 0.35 million in 2021. Production from aggregate permits on Crown Land decreased (3.2%) from 2021 (6.41 million in 2022 from 6.62 million tonnes in 2021).

Note: Totals and percentage changes are based on numbers from Table 1 format.

## **Note to the Reader:**

The statistics in this report reflects aggregate sites that fall within the Designated Area of the Pits and Quarries Control Act or the more recent Aggregate Resources Act. This geographical area has increased periodically throughout the years resulting in increases in licensed or permitted sites subject to the applicable Act, which are not necessarily new aggregate sites being created. Please refer to Appendix B for a list of the historical designation of private land under the Pits and Quarries Control Act and the Aggregate Resources Act.

Data used to in this report for statistics on changes to the disturbed areas, including new rehabilitated area and new disturbed area is supplied by licencees and permittees and are not independently audited by TOARC. This data reflects what is reported on Compliance Assessment reports submitted to the Ministry of Natural Resources and Forestry.

Table 1

**Production Statistics Report**  
**Table 2 Lower Tier Grouping Guidelines**

The guiding principal is to not disclose the confidential information of a single client's tonnage.

1. There must be a least 3 clients with a minimum of 2 reporting tonnage, each with licenses, in any municipal (lower) tier that appears in the stats report.
2. If the above guideline can't be met then the grouping of lower tiers is required based on the following rules:
  - a. Upper tiers with multiple lower tier groups of 2 or less must be combined for the 3 client minimum lower tier grouping provided there are at least 2 clients reporting tonnage.
  - b. The preferred criteria for determining groups will be based on geographical proximity.
  - c. A single lower tier reporting ZERO tonnage is not reported if it is not required for the above minimum 3 client grouping.
  - d. If geographic proximity can't be resolved then historical (grouping of past stats reports) will determine grouping.

## APPENDIX A

### GLOSSARY OF TERMS

For actual definitions, please refer to the Aggregate Resources Act.

#### Active Licence

A licence that has been issued, being transferred, or under suspension at the end of the calendar year.

#### Aggregate

Includes sand, gravel, limestone, dolostone, crushed stone, rock other than metallic ores, and other prescribed material.

#### Aggregate Permit

A permit for a pit or quarry issued under the Aggregate Resources Act allowing for the excavation of aggregate that is the property of the Crown, on land where the surface rights are the property of the Crown, or from land under water.

#### ALPS

The MNRF Aggregate Licence and Permit System (ALPS) is an automated data base that facilitates the management of mineral aggregate production and related information, for individual licences, aggregate permits and wayside permits across the province.

#### Building Dimension

A slab or block of rock, flagstone if foliated and dimension stone if massive, generally rectangular, and cut to specified measurements for ornamental surfacing in buildings or other construction applications.

#### Clay/Shale

Clay is a fine-grained, natural, earthy material composed primarily of hydrous aluminum silicates. It is plastic when moist and hardens when dried. Shale is fine-grained sedimentary laminated rock predominantly composed of clay grade and other fine minerals.

#### Class A Licence

A licence under the Aggregate Resources Act to allow excavation of more than 20,000 tonnes of aggregate annually from a pit or quarry within parts of Ontario that have been designated under the Aggregate Resources Act.

#### Class B Licence

A licence under the Aggregate Resources Act to allow excavation of 20,000 tonnes or less of aggregate annually from a pit or quarry within parts of Ontario that have been designated under the Aggregate Resources Act.

#### Crown Land

Ownership of land which is vested in the Crown or owned by the Province of Ontario.

#### Crushed Stone

Rock or stone mechanically crushed to specified sizes and grading.

#### Designated Area

An area of the Province identified by regulation under the Aggregate Resources Act where a person requires a licence for the excavation of aggregate from private land.

### Disturbed Area

An area within a site that has been, or is being excavated to operate a pit or quarry, and has not been rehabilitated.

### Gravel

Small stones and pebbles or a mixture of sand and small stones. More specifically, fragments of rock worn by the action of air and water, larger and coarser than sand. MTO specifications define gravel as unconsolidated granular material greater than 4.75mm.

### Housing Starts

The number of housing units started where construction has advanced to 100 per cent of footings. In case of multiple dwellings, a "start" implies the commencement of individual structures.

### Inactive Licence

A licence that has been revoked or surrendered prior to the end of the calendar year.

### Licence

A licence for a pit or quarry issued under the Aggregate Resources Act allowing for the extraction of aggregate in designated areas.

### Licensed Area

A specific area for which a licence has been issued for the extraction of mineral aggregates under the Aggregate Resources Act.

### Pit

Land or land under water from which unconsolidated aggregate is being or has been excavated, and has not been rehabilitated.

### Private Land

Land owned by an individual or corporation, as opposed to land which is owned by the Crown.

### Progressive Rehabilitation

As per the requirements of the Aggregate Resources Act, sequential rehabilitation completed within reasonable time over disturbed land from which aggregate has been extracted. The rehabilitation is carried out according to the Act, the regulations, the site plan, and the conditions of the licence or permit during the period that aggregate is being extracted.

### Pits & Quarries Control Act

An Act to manage and regulate mineral aggregate extraction in Ontario. The Act had been automatically repealed and replaced by the Aggregate Resources Act as of January 1, 1990.

### Quarry

Land or land under water from which consolidated rock is or has been excavated and the site has not been rehabilitated.

### Rehabilitation

To treat the land from which aggregate has been excavated to a pre-excitation condition or use, or to a condition compatible with adjacent land.

### Royalty

A payment made to the Crown in recognition of the extraction of aggregates owned by the Crown. Under the Aggregate Resources Act, the royalty is set at a minimum of 53.9 cents per tonne. The Minister may set a higher rate or may allow exemption.

### Sand

Any hard granular rock material finer than gravel and coarser than dust. MTO specifications define sand as granular material ranging in size from .075mm to 4.75 mm.

### Wayside Permit

A permit issued to a public authority or a person who has a contract with a public authority for a temporary road project or an urgent project for which no alternative source of aggregate is available under licence or permit. A wayside permit expires 18 months from the date of issue or upon completion of the project, whichever comes first.
